## 二、报告目录及图表目录

摘要 Following the majority-privatisation of Burkina Faso's incumbent telco, Onatel, fresh investment and new technologies have accelerated the development of the national network infrastructure. The government is planning to sell an additional 20% in the company in 2008 through an initial public offering (IPO). Onatel operates the country's fixed-line network, a CDMA wireless network, a fibre optic backbone and one of three GSM mobile networks. Mobile telephony has experienced outstanding growth, with subscribers now outnumbering fixed lines in the country by more than 15:1. The Internet and broadband market is expected to receive a boost when cheaper international bandwidth becomes available from new submarine fibre optic systems reaching the region in 2008/09. With market penetration well below African averages, the growth potential in all market sectors is excellent.

目录及图表 1. Synopsis

2. Key statistics

3. Overview of Burkina Faso's telecom market

4. Regulatory environment

4.1 Historic background

4.2 Regulatory authority

4.2.1 Autorite Nationale de Regulation des Telecommunications (Artel)
